VERSATIX™ MP

Setting a new standard in cutting structural steels, sections, tubes and small solids. New tooth design ensures that the blades can easily handle the stock loading conditions associated with intermittent cutting.

Features and benefits:

- New tooth design significantly increases tooth strength and reduces stripping
- Ideal for use on manual "pull down" band saw machines where uncontrolled feed rates can overload the teeth of a standard blade
- Triple-tempered, **high-speed M-42 cobalt steel** teeth are combined with a fatigue-resistant alloy steel backing strip

Application:

- Structural steel section
- Tubes and small solids

Starrett®
