AUTOCRIB® RDS

The RDS (Remote Dispensing Station) is the industrial vending machine that started it all. Often imitated but never duplicated. The RDS is great for stocking up to 70 SKUs. It's the perfect machine for providing 24-hour a day access to your high value, fast moving, and critical inventory items while maintaining full accountability.

The intuitive keypad makes selecting and dispensing items easier than ever. An optional 12.1 inch touch screen can be added to display even more information. If you are a growing company and want an upgrade path in place from day one, the RDS is a great place to start.

It's easy to re-configure as your needs change, the software is fully compatible with AutoCrib's enterprise wide solutions, so adding any AutoCrib machine to your system is easy. Adding an AutoLocker enables you to dispense large, bulky, or durable items or tools that need to be tracked and returned.

Every RDS comes standard with VendVerify™, the best verification system in the industry! VendVerify™ prevents items from getting stuck while avoiding the double drops that plague other systems. The secret is our laser detection system and precision controls you won't see anywhere else.

HOW IT WORKS

1. Login – Employees access the RDS by using their employee badge or employee number.

2. Select Item – Users then enter the bin number, or scan a barcode on the pick sheet.

3. Dispense – The VendVerify™ system ensures a perfect item vend every time.

Optional: A PIN can also be required as well as prompts to track overhead data like Department Number, Job Number, Customer Number, Tail Number, etc.

FEATURES

- 24-7 Availability - With security and accountability
- Configurations: Standard 60 SKUs (Unique Products) expandable up to 70 SKUs
- Keypad is standard. (12.1" touchscreen is optional)
